**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-32 are rejected under 35 U.S.C. 102(b) as being anticipated by Behnke et al. (USPN 5,520,641).

Behnke discloses a membrane-cannula combination for biological applications, said combination comprising a cannula (C) for conveying a fluid, a casing (20, 24, 30), and a membrane (126) accommodated by said casing and comprising an elastic membrane material through which a passage is formed, into which said cannula can be inserted, wherein said passage is expanded by inserting the cannula and said membrane material presses against the casing, generally perpendicularly relative to the passage, and elastically presses against the inserted cannula such that the membrane material surrounds the cannula in a seal; wherein e) the passage and the cannula exhibit different cross-sectional shapes relative to each other before the cannula is inserted and one of the

passage or the cannula has an elongated cross-sectional area (see figures 1, 2, 4, 6-9, and entire reference).

3. Claims 1-32 are rejected under 35 U.S.C. 102(b) as being anticipated by Ouchi (USPN 6,210,377).

Ouchi discloses a membrane-cannula combination for biological applications, said combination comprising a cannula for conveying a fluid, a casing (2600); c) and a membrane (2721P, figure 86) accommodated by said casing and comprising an elastic membrane material through which a passage is formed, into which said cannula can be inserted, wherein said passage is expanded by inserting the cannula and said membrane material presses against the casing, generally perpendicularly relative to the passage, and elastically presses against the inserted cannula such that the membrane material surrounds the cannula in a seal; wherein the passage and the cannula exhibit different cross-sectional shapes relative to each other before the cannula is inserted and one of the passage or the cannula has an elongated cross-sectional area (see figures 22, 27, 78-88, and Columns 15,16, & 27-29).
